Next-Generation Data Access For BI & Analytics

Modern business depends on real-time data analysis to deliver actionable insights and drive growth. Our drivers offer the fastest and easiest way to connect BI, Analytics, ETL, and custom applications to that data, wherever it resides.

Our data connectivity tools support a new era of analytics and cognitive computing. Modern users demand that applications retrieve and process massive datasets at speeds that were once inconceivable, and our drivers have been specifically engineered and optimized for data-intensive reporting and analysis.

Features for BI & Reporting:

- Real-Time Access to Data
- Rich Metadata Discovery
- Robust SQL-92 Support
- High-Performance Data Connectivity

Metadata Discovery

All drivers expose rich metadata, critical for automated data exploration and discovery. Includes intelligent rowscan, type detection, relationship exploration and support for unstructured data.

Robust SQL-92 Engine

Built on a rich SQL-92 engine with support for bulk operations, push-down, client functions, and aggregation, our drivers seamlessly handle even the most complex queries from modern BI & Reporting.

Unmatched Performance

With optimized performance down to the socket level, our drivers offer unmatched performance. Read and write speeds over twice as fast as other SaaS, NoSQL & Big Data connectivity solutions.

Data Sources Available:

NoSQL, Big Data, & RDBMS

✓ Amazon Athena	✓ Amazon DynamoDB	✓ Amazon Redshift	✓ Apache Cassandra	✓ Apache HBase
✓ Apache Hive	✓ Apache Spark SQl	✓ Azure Table Storage	✓ Cloudera Impala	✓ Couchbase

CData Software – A leading provider of data access and connectivity solutions

Our mission is to simplify the way that users and applications connect with data. We offer a straightforward approach to integration, with easy-to-use data providers, drivers, and tools available from any technology capable of interacting with major database standards.

Our drivers are universally accessible, providing access to data through established data standards and application platforms such as ODBC, JDBC, ADO.NET, OData, SSIS, BizTalk, Excel, etc. This approach allows businesses to realize the tremendous benefits and costs savings of integration while reducing complexity and expense.

Visit www.cdata.com to learn more and download FREE Trials.
